INDEX CARD

Cable gland plug type Z-WKp

Application:

The end cap in place of the Z-WKp type cable inlet is intended for installation in place of the WKp type inlets by Izol-Plast or also for the WKs type inlets when no wire or cable is inserted and when there is no need or possibility to use them.

The end cap in place of the Z-WKp type cable inlet is constructed as a welded structure. The blanking plate is attached to the device with two M12 screws. There is a flameproof cylindrical-flange joint between the cover body and the flameproof enclosure.

Certificate:

The Z-WKp plugs have the following EU-type examination certificate: **KDB 05ATEX148U / 4 of June 20, 2012**, carried out by the Central Mining Institute, the Certification Body of the Experimental Mine "Barbara" as a supplement to the EU-type examination certificate **KDB 05ATEX148U** of **May 12, 2005**, and meets the requirements of:

- PN-EN 60079-0:2013,
- PN-EN 60079-1:2014.

According to the EU-type examination certificate, the plugs for the Z-WKp type cable glands have been marked as follows:

KDB 05ATEX148U
I M2 Ex d I Mb
II 2G Ex d IIC Gb
