Description of the mechanical structure of the locomotive:

The ELA-44 / 1,2,3 battery-powered electric locomotive consists of three parts connected with each other by means of bolts. These are the main body and two service cabins. This solution facilitates the transport of the locomotive to the underground of the mines. The booths have OISP control panels, URO-1 flameproof reflectors, flameproof horns and other equipment. The main body consists of the chassis and drive (two wheel sets with gear and engine), hydraulic (brake) system, SFIS gearbox. A rechargeable battery of the SBS-4W or SBS-4WZ type is mounted on the main body.

Description of the locomotive's electrical system:

The electric system of the locomotive consists of the following components:

- flameproof intrinsically safe console box OISP (2 pcs),
- Joystick housing with Joystick (2 pcs.),
- universal flameproof reflector type URO-1 (4 pcs.),
- point reflector type RP-100 (2 pcs.),
- electric buzzer type KBB-052 (2 pcs.),
- flameproof box of SFIS inverters and controllers (1 pc.),
- explosion-proof battery of reinforced construction type SBS-4W or SBS-4WZ (1 pc. + 1 reserve),
- three-phase electric motors of the drive, type dSKg 180 L4-EP-f (2 pcs.),
- dSLg 90 L4-f hydraulic pump motor (1 pc.)
- operator identification system as well as locomotive speed and time recording system.

Description of the braking system of the locomotive

The entire braking system of the locomotive will consist of three completely independent braking systems. These are:

- hydraulic brake - emergency,

- electric brake electric braking by motors with energy return to the battery,
- mechanical brake parking.

Certificate:

The ELA-44/1 or 2 or 3 locomotive has a certificate of compliance No .: OBAC14CZ / ATEX0611X of 09/12/2014 with Annex 4 to the certificate of 19/12/2017, which are issued by the Center for Testing, Attestation and Certification OBAC Sp. z o. o. in Gliwice. The locomotive also has the OBAC / 0611 / MD / 14 certificate of 09.12.2014 for compliance with the requirements of Directive 2006/42 / EC (Machinery Directive) and the PN-EN 1889-2 + A1: 2010 standard for the mechanical part. The Electric Battery Locomotive of the ELA-44/1 or 2 or 3 type is marked with:
