	Glass of oil gauges	

PHPU "Izol-Plast" Sp. z o. o. manufactures various types of glass oil gauges intended for use in distribution stations type ROK-6 and any other devices.

The glass of oil gauges is made in all types of execution, in any diameter and thickness. At the customer's request, the glasses can be made with various types of inscriptions or markers.

The glass of oil gauges can also be made in tight metal housings, adapted for welding or screwing them into a given device.
