	A set of universal keys for mine switches type KWS, OW	

A set of universal keys for mine switches type OW, KWS.

A set of three-sided universal wrenches with dimensions 190x210mm with a set of 8 interchangeable tips is intended for use in mine switches type OW and KWS.

The set of keys includes eight types of interchangeable tips:

- allen key(8, 10, 14),
- triangle (10, 12, 16),
- hexagon (17, 24).

The key also contains:

- triangular tip 8,
- hexagonal tip 19,
- 10 tooth sprocket.

The set of universal keys is protected against corrosion by galvanic coating with a layer of zinc. The replaceable ends of the key are connected with a pendant.
